

In short, it is important for us, not just to consider Russian causes. As an International school we need to consider Global causes too."

Indeed, as an international community of different countries, we need to participate in the global community, and that includes philanthropy.

It is obvious to all of us that any help is important, not necessarily financial. Helping relatives, loved ones, friends, those in need - all this is not in vain, and all is not in vain, you are still contributing to the piggy bank of good around the world. As Mother Theresa said, "We ourselves feel that what we are doing is just a drop in the ocean. But the ocean would be less because of that missing drop.".

Do more acts of kindness and unselfishness, and then our world will become a little better every day!
